

Journey of Discovery

"Although to acquire the sciences and arts is the greatest glory of mankind, this is so only on condition that man's river flow into the mighty sea, and draw from God's ancient source His inspiration . . ." — 'Abdu'l-Bahá

You may not think of it when you're studying for a big test or struggling with homework, but knowledge is one of the greatest gifts from God. You have the ability to learn and investigate anything that sparks your curiosity. The sciences and arts are like bridges that can help you connect to people, solve problems, and build a better world.

You may delve into science and decide to become

a marine biologist or an astronaut. You might use your creativity to become a painter or a poet. Maybe you'll start your own company or save lives in an emergency room. As you explore your interests and build your skills, let your spirit grow, too. Balancing knowledge and faith, you can expand your wonder and appreciation for God's creation. Where will your discoveries lead you?

These kids are ready for the adventure of their lives. Help them find their way over and under bridges, avoid danger, and reach the Sea of Serenity.
