

DARING DOGS

You're hiking up a frosty mountain when a rescue team cruises by. To your surprise, *dogs* are on the snowmobiles!

After an avalanche or accident, these furry experts use their sense of smell to find people under snow and ice. In minutes, they can search an area that would take us *hours*. The daring dogs ride vehicles or hop on their handlers' shoulders. They're trained to persevere in *ruff* conditions.

Heroic canines don't only work in snow. They patrol beaches, wilderness areas, and natural disaster sites, too!

Like our four-legged friends, we use courage and focus to help the world. We can sniff out ways to work together. If a friend's homework is piling up, offer to help them study. If you're building a snow fort, invite others to join. By sticking to a trail of kindness, you can *unleash* your inner hero!
